PROJECT STATUS UPDATE

Mixed Tenses Writing - B1+ / B2

Situation

You are part of a web development team working on a project for a client. Before the weekly meeting, your team leader asks you to write a short project status update.

Your task

Write **150-180 words in four paragraphs**. Use the verb tenses that best fit your ideas. Do not try to use every tense from the unit.

1. THE PROJECT NOW

What is the project? What does your team normally do? What are you working on now?

Present Simple / Present Continuous

2. PROGRESS SO FAR

What have you completed? What is still unfinished? How long have you been working on something?

Present Perfect / Present Perfect Continuous

3. A RECENT PROBLEM

What happened? What were you doing? What had happened before? How did you solve it?

Past Simple / Past Continuous / Past Perfect

4. NEXT STEPS

What is arranged? What are your plans? What do you expect to complete before the deadline?

Future forms

GRAMMAR TARGET

Your writing must include: **one present tense, one Present Perfect form, one past tense, one future form, and at least five different verb forms in total.**

B2 challenge: use six or more different forms and include at least one naturally: Present Perfect Continuous, Past Perfect, Future Continuous or Future Perfect.

Before you write

1 Choose a project | **2** Decide what is happening now | **3** Choose one recent problem
4 Decide the next steps and deadline

Use the model for structure and language, but create your own situation. Write notes first - not full sentences.

Idea bank

PROJECT	CURRENT WORK	PROBLEM	NEXT
shop / portfolio	homepage / database	server / database	testing / meeting
school site / booking app	login / mobile	login / files	redesign / security
	accessibility	display	new feature

Plan your ideas

Project	Portfolio website for art students	**Problem**	Login system crashed during testing
Current task	Login page and search function	**Cause / solution**	Updated dependency and restored backup
Progress	Homepage and database finished	**Next steps**	Client meeting and final testing
Unfinished	Mobile version	**Deadline**	Next Friday

Remember: your project, problem and future plans must be different from the model. Aim for at least **five different verb forms**, including present, Present Perfect, past and future.

PROJECT STATUS UPDATE

Model answer, connector bank and essential tips

Model answer

Our team is currently developing an online booking system for a hotel. **In general**, we divide the work between front-end and back-end tasks, but **at the moment** we are focusing on the reservation page and the mobile version.

So far, we have completed the homepage, the room catalogue and the contact section. **However**, we haven't finished the payment system yet because we have been dealing with a security issue for the last few days. **Apart from that**, the project is progressing well.

Yesterday, we had a problem with the booking form. **While** I was testing it, the website suddenly stopped saving new reservations. **After checking the system**, we discovered that a database setting had been changed by mistake. **Fortunately**, we had a recent backup, so we restored the previous configuration and solved the problem.

As for the next steps, we are meeting the client tomorrow to discuss a few final changes. **After that**, we are going to start the final testing phase. **If everything goes according to plan**, by the end of next week we will have completed the main version of the website.

Model: 184 words

Connector bank - choose what fits your paragraph

1. NOW	**In general** · **usually** · **normally** · **at the moment** · **currently** · **while**
2. PROGRESS	**So far** · **up to now** · **however** · **also** · **in addition** · **apart from that** · **yet**
3. PROBLEM	**recently** · **yesterday** · **while** · **when** · **after** · **before** · **fortunately** · **eventually** · **as a result**
4. NEXT	**as for the next steps** · **after that** · **then** · **next** · **in the meantime** · **if everything goes according to plan** · **by...**

Think about WHEN the action happens first. Then choose the tense.
Do not force a difficult tense just because it appears in the grammar list. **B2:** use 6+ forms and include one naturally: Present Perfect Continuous, Past Perfect, Future Continuous or Future Perfect.

Essential tips

1. Follow the four-paragraph structure.

2. Use connectors, but do not overuse them.

3. Avoid starting every sentence with *We...*

4. Use specific web-development vocabulary.

5. Check time expressions: yesterday, since, for, yet, at the moment, by Friday.

6. Re-read for verb forms, spelling and punctuation.

PROJECT STATUS UPDATE

Write your final version here

Name	Pablo Nunez Fernandez	Group	2 DAW	Date	11/10/2026

Project Status Update

Write **150-180 words** in four paragraphs. Use your notes from page 1. You may use the model as a language guide, but your content must be your own.

Our team is currently working on a portfolio website for art students. Usually, we split the tasks between design and coding, but at the moment I am focusing on the login page and the search function.

So far, we have finished the homepage and the database structure. However, we haven't completed the mobile versior yet, and we have been working on accessibility for almost two weeks.

Last Monday, we had a serious problem with the login system. While I was testing it, the server suddenly crashed. After checking the logs, we found out that someone had forgotten to update an old dependency. Luckily, we solved the problem quickly and restored the backup.

As for the next steps, we are meeting the client on Thursday to show the new design. After that, we are going to start the final testing phase. If everything goes well, by next Friday we will have finished the whole website.

Final check

- ✓ 150-180 words
- ✓ 4 clear paragraphs
- ✓ 5+ different verb forms, including present, Present Perfect, past and future
- ✓ Connectors link my ideas clearly
- ✓ Specific web-development vocabulary
- ✓ My ideas are different from the model's
- ✓ Spelling and punctuation checked
